**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

### DETAILED ACTION

This non-final Office Action is mailed in response to amendment filed 11/23/2005 wherein claims 1,4,22,24,26,27,29, and 30 were amended and claims 25 and 28 were cancelled.

### ***Election/Restrictions***

Applicant's election with traverse of the restriction requirement in the reply filed on 3/09/2006 is acknowledged. The traversal is on the ground(s) that the claimed inventions of claims 24, and 25, 27, and 30 do not show separate utility. This is found persuasive because the inventions are not seen as being distinct.

Claims 1-4, 22-23, 26, 31, and 32-33 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected inventions, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 3/09/2006.

Applicant has not elected as species of the invention as listed in the previous Office action mailed 2/07/2006. For the purpose of expediting the examination process claims 5-21, 24, 27 and 30 will be examined as requested by Applicant. However, claim 30 is directed towards a distinct species.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 5, 6, 24, 27, and 29-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Harlingen (US 2,149,489). Harlingen discloses a file organizer having a plate (A), a plurality of vanes (prescriptions, pg. 2 ln. 82-84), and a band (E). The plate (A) is understood to have first side (bottom) and second side (top) with the vanes in between. Each vane is attached at one end to the sheet "C" which is attached to the plate "A" (pg. 2 lines 11-16). It is also within the purview of Harlingen that sheet "C" can be removed and the vanes be attached directly to the plate (pg. 2 lines 16-19). Figure 1 shows the band extending from the first to the second side. The band (E) is disclosed to be attached to the plate (pg. 2 lines 84-87), therefore a catch is inherent. For example the catch could be either a staple or adhesive.

With respect to claim 6, the vanes are disclosed as prescriptions. The prescriptions are disclosed as being made from paper (pg. 1 lines 10-16), and described later as being turned back (pg. 2 lines 84-91). Figure 1 shows the vanes in the turned back position, demonstrating their inherent flexibility.

With respect to claim 24, Harlingen discloses a file organizer having a plate (A), a vane (prescriptions, pg. 2 ln. 82-84), and a band (E). Figure 1 shows the band extending from the first to the second side. The band (E) is disclosed to be attached to the plate (pg. 2 lines 84-87), therefore a catch is inherent. For example the catch could be either a staple or adhesive.

With respect to claim 27, Harlingen discloses a file organizer having a plate having first (A) and second (B) ends, a plurality of vanes (prescriptions, pg. 2 ln. 82-84), and a band (E). Figure 1 shows the band extending from the first to the second side. The band (E) is disclosed to be attached to the plate (pg. 2 lines 84-87), therefore a catch is inherent. The file organizer of Harlingen is also seen as being adapted to be placed flat and carried vertically. A handle is inherent feature of the covers (A) and (B) as that is where the file organizer would be gripped.

With respect to claim 29, the band (E) is disclosed to be attached to the plate (pg. 2 lines 84-87), therefore a catch is inherent.

With respect to claim 30, the first (A) and second (B) sections are separated by a fold line so that the second portion may be folded over the first section (pg. 1 lines 77-83).

***Allowable Subject Matter***

Claims 7 –11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Harlingen does not show the band being received in an opening, and provides no motivation for having the band detachably connected to the plate.

Claims 12-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Harlingen shows the vanes being attached to the plate by means of adhesive, therefore providing no motivation to provide slots in the plate.

Claims 18-21 are allowed.

***Response to Arguments***

Applicant's arguments with respect to claims 1-24,26-27,29-32 have been considered but are moot in view of the new ground(s) of rejection. The previously indicated allowability of claims 5-21, and 24 is withdrawn in view of the newly discovered reference: Harlingen ('171).

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ainsworth (US 2,149,489). Ainsworth discloses an organizer having plate (2), a plurality of vanes (photographs), an elastic band (16), and a catch on the plate (18).

Straus (US 2,087,786). Straus discloses a file organizer having a plate (10) with a first (rear cover, 15), and second (front cover, surface 12) end, and a fold line (17). The vanes (20) are attached at area 21a (pg. 2 lines 2-5), between the first end and the fold line.

Parker (US 682,266). Parker discloses a plurality of vanes (B-F) secured to a plate (A), and an elastic strap (2) disposable over the vanes.
